

High-Protein Low-Carb Pita Bread (Almond Flour Version)

A soft, flexible, higher-protein low-carb pita bread using almond flour, pea protein isolate, and functional fibers for improved protein, satiety, and texture while remaining eggless and vegetarian.

Ingredients (Makes 4 Small Pitass)

- 3/4 cup fine blanched almond flour
- 1/4 cup pea protein isolate
- 2 tbsp oat fiber OR bamboo fiber
- 1 tbsp psyllium husk powder
- 1 tsp baking powder
- 1/2 tsp salt
- 3 tbsp full-fat Greek yogurt
- 1 tbsp olive oil
- 1/2–3/4 cup warm water (add gradually)
- Optional: garlic powder, oregano, za'atar, sesame seeds

Method

- Whisk all dry ingredients together.
- Add yogurt and olive oil.
- Gradually add warm water until soft dough forms.
- Rest dough 10–15 minutes for hydration.
- Divide into 4 balls.
- Roll between parchment sheets into circles.
- Cook on hot skillet 1–2 minutes per side.
- Keep covered after cooking for softness.

Tips & Tweaks

- Do not add all water immediately; fibers absorb moisture slowly.
- Oat fiber gives softer pita texture while bamboo fiber gives lower carbs.
- Slightly thicker rolling improves flexibility.
- Cast iron skillet gives best texture.
- Adding mozzarella improves elasticity.

Interesting Variations

- Garlic Herb Version with oregano and parsley
